

# VIJAY KUMAR KALLA

Entry Full Stack Developer| Software Engineer

Phone: +919573975450 Email: [vijaykalla96@gmail.com](mailto:vijaykalla96@gmail.com) LinkedIn: [LinkedIn/in/VijayKumar](https://www.linkedin.com/in/VijayKumar) GitHub: [VijayKalla](https://github.com/VijayKalla)

## CAREER OBJECTIVE

Recent Information Technology graduate with a strong focus on database development and backend systems. Currently pursuing MERN stack training to build full-stack web applications. Seeking an entry-level role as a Full Stack or Backend Developer where I can apply my knowledge in database management, web technologies, and software development to contribute to a dynamic team.

## EDUCATION

MERN Stack Trainee(In Progress) NXTWAVE	Dec 2024 – Oct 2025
Bachelor of Technology in Information Technology Sasi Institute of Technology and Engineering	August 2019 – June 2023 CGPA: 7.59
Board of Intermediate Education Aditya Junior College	June 2017 – March 2019 CGPA: 9.7

## TECHNICAL SKILLS

- **Programming Languages:** Python, C
- **Web Technologies:** HTML, CSS, JavaScript, NodeJS, ReactJS
- **Database Knowledge:** SQL, PL/SQL, SQLite
- **Operating Systems:** Windows
- **Version Control:** Git, GitHub

## INTERNSHIP

Virtusa - Intern June 2023 – September 2023  
Project: E - Commerce Database

- Developed and implemented back-end solutions for an e-commerce database project, utilizing Database Modelling Concepts and SQL Concepts
- Utilized PL/SQL and SQL within Oracle Database to design and optimize database schema, improving data retrieval times by 10% and ensuring seamless transaction processing.
- Supported data validation, transformation, and storage tasks within Oracle databases.
- Generated detailed reports and analytics using SQL queries.
- Helped improve backend data processes and optimized existing database queries.
- Collaborated with senior developers to troubleshoot and enhance data access layers.

## PROJECTS

Authentication System (React + Node.js + SQLite) (Sep 2025)

- Developed a secure login/logout flow with React (frontend) and Node.js + SQLite (backend) using session-based authentication.
- Implemented user registration, login, session persistence, and logout with password hashing (bcrypt) to ensure data security.
- Designed a responsive frontend UI with React, featuring protected routes and user-friendly error handling.
- Achieved clean project structure and deployed code on GitHub for public access and demonstration.
- GitHub: [github.com/VijayKumarKalla/auth-log-in-out](https://github.com/VijayKumarKalla/auth-log-in-out)

Food Donation App

November 2022 – January 2023

- Engineered and optimized back-end functionalities for a food donation app, leveraging Python and SQL to enhance data retrieval speeds, ensuring seamless user experience.
- Established and implemented interactive front-end features using HTML and CSS, resulting increase in user engagement
- Designed and executed database architecture using Oracle SQL, achieving data accuracy rate and reducing query response time.
- Cooperated with cross-functional teams to define and prioritize feature development, leading to improvement in project delivery timelines and meeting all milestone deadlines.

## **TRAININGS & CERTIFICATIONS**

---

- Certified as an Oracle Database PL/SQL Developer Professional.
- Achieved Oracle Database SQL Associate Certification.
